**CALMING RITUALS & NATURE
BEDROOM**

domkapa.com | info@domkapa.pt

A bedroom design that feels effortlessly calming and chic thanks to the colour palette inspired by nature.

This bedroom design, in a heritage style, has all the elements we want in our calming rituals: simplicity, texture and a soothing atmosphere that make us sleep tight. Incredibly modern, it is elegant and has the right amount of depth and density.

While the architecture is inspired by spring, the selection of the furniture is the finishing touch, where every little detail plays nicely, making us feel at home.

The main character of this space is Yumi Bed. Inspired by a concept of elegance, comfort and balanced lines, it is suitable for both minimalistic interior designs and modern ones – the entrance ticket for a world of sweet dreams.

Colbert Bench brings shine to this bedroom, as it features both delicate single and double-top stitching for a feeling of luxury, even if it is discreet.

Along with Colbert, Ralph Hanger brings functionality to the room, as it has a unique spotlight: a vintage-style tray that rotates 360° so you can store your keys and other small objects enhancing the style of your project.

Finally, with extreme simplicity, Zigzag Pouf brings a bright light to the design. Zigzag has an unconventional shape, embellished with horizontal and vertical pleats that give a fun twist and special mood to the piece.

For additional seductive power, place a fair amount of natural elements, layering tone and texture in your bedroom interior design project.
